APPENDIX 1

Question 4: Please share any comments on housing or future development.

Responses to paper survey.

Comments
No future development unless health infrastructure is done first. Hospitals, GPs, health centre.
Future development is fine but sort out infrastructure - i.e. doctors
Doctors infrastructure and sewage cannot cope with current housing
More retail shops are required
You ask for public input on new development and residents say they don't want more new houses in Wroughton, may as well not bother as building loads more. Never mind the roadworks, traffic congestion/pollution
Please stop building more houses, Wroughton cannot cope
Concern about the large scale development at the back of Swindon Road. Doctors surgery and pharmacy currently struggle to cope with existing residents.
Any future housing should include supporting services e.g. schools and doctors etc.
Any increase in population has to reflect services e.g. GPs
Too much development without any planning for quality of living
Additional houses require additional facilities - healthcare, shops, schools etc. The wider impact on roads must be considered e.g. more houses at Thorney Park//Langton Park increases traffic on Priors Hill
We keep getting new houses being built but no new facilities
There should be no further large scale development until the infrastructure is able to support the current population adequately. Resist all further planning decisions by SBC on greenfield sites until then.
Wroughton is over-stretched. It has lost its community
Wroughton needs to remain as it is and retain the feel of a village
Before any ore housing, we need expanded services. The GP surgery is too small. We need a new proper market
Healthcare and schools are stretched. Put them in before new homes are built
Already too many houses
I don't feel we need more housing. We do need more resources in healthcare. If more housing is built this is a must
It's a shame that so many bungalows have been converted into houses. Bungalows are so good for elderly people and Wroughton has lots
No more housing, we are no longer a village
We need another doctors surgery as there are too many residents using the Wroughton one. We have sufficient housing in Wroughton at present
All new homes should have solar and water heating panels on the roof
Wroughton is already over developed
Too much development and too great an increase in the population numbers with green spaces being built on

Comments

Hope green spaces can be protected

Wroughton has suffered enough with house building

Infrastructure does not suppoer further development

Wroughton has been extended too much. We are a village and do not need any more houses. We do not have enough doctors/dentists to cope with the numbers

Wroughton is a village and we need to keep our identity. Too much housing is being built on our boundary

The last thing Wroughton needs is more housing. 16,000 people trying to use a less-than-tiny doctors surgery is beyond ridiculous

Wroughton has enough new developments. It should not have any more or it will be swallowed up in urban sprawl

These should be small in size and not look like 'barracks' like in Wichelstowe

Wroughon needs better shops before increasing the number of houses and another doctors surgery

Infrastructure needs upgrading first prior to development. The area is meant to be a village and not a small city

The parish doesn't have the infrastructure necessary for further development

We do not need any further housing in the parish as we have already fulfilled our allocation by having Middle and West Wichel in our boundary

No more new housing unless infrastructure is improved

No more housing built on green spaces. Healthcare must be increased before anu further development. The current practice is stretched with the existing population

The local facilities and roads are already under strain and cannot support further development. Build on Swindon brownfield sites

No more housing developments

No more new homes in Wroughton

Protect our green spaces

We do not have the infrastructure for current resident numbers, let alone for all new planned developments

No more houses at all

This is a village community. Wichelstowe has been extensively developed and not attractively in some areas

Hard to say where houses should go because Wichelstowe is still being built

Improve the parish's infrastructure

Wichelstowe model works well. Overpopulation should be monitored so character isn't lost. Green space for wildlife is important

We should have more flats

We don't need any more, it's spoilng our village

Reduce housing demand by reducing population

No more building without proper infrastructure in place

More houses means more traffic and we are a village - our roads are not built for HGVs etc.

No further housing should be built until infrastructure is built, especially in Wichelstowe - doctors and pharmacy needed

Comments

Ensure the infrastructure is in place

Swindon centre should be used for new houses first. Wroughton is in AONB and should be protected

Wroughton is big enough now and shouldn't expand further

No more building

Conserve green spaces, hegerows and trees

New healthcare provision before more houses are built

House building has put strain on healthcentre - new one needed at Wichelstowe

No more development - it no longer feels like a village but a dormitary suburb of Swindon

Keep Wroughton as a vllage

Overbuilding leads to too much traffic. Local ameneties can't cope as it is. Everything spread too thinly with poor healthcare and too much pollution

No more housing development in Wroughton

All future housing development should note impact on roads, healthcare and education

Future development adversely affects healthcare, which is struggling to cope. The traffic in the village is concerning with volume of cars using the roads

We are losing field after field to housing. There are many empty properties all over the country

The expansion along the M4 is inevitable. Infrastructure and doctors surgery paramount. Difficult to maintain 'village' status, more likely to become a suburb of Swindon

Developments being built but not enough infrastructure - schools, doctors transport

We need green space between Wrougthon and Wichelstowe

No more future developments until more healthcare provision

Reduce mass immigration then future development should not be required

Wichelstowe needs medical clinic and allotments, which were promised

Wroughton is overwhelmed with housing. We need more services - doctors, pharmacy, dental, shops and public transport

Wroughton is being destroyed with house building, and Wichelstowe is now a complete housing estate we have enough

Wroughton has had its fair share of housing. Medical facilities are stretched beyond limit

For Wroughton to retain its character - no more large developments or it will become a suburb of Swindon

We don't need further development in Wroughton, just sort the empty buildings - Co-op should be housing. More brownfield sites. Keep the major building in Swindon

Wroughton has a sufficient balance of all housing types - but bungalows shouldn't be converted into family homes, they need to remain for elderly people

OK for housing growth but not without schools, doctors, shops etc.

No more building on greenfield sites. Wroughton is losing its character

No problem with developments but the infrastructure needs to be in place first. For Wroughton, the village identity should be maintained

So many houses have been built in Wroughton without any thought to the stretche services - doctors, schools, roads, water supply and sewage. We also need better police protection

Should now be minimised

Comments

All new housing needs aequate sized garages/parking spaces - I can't access my drive because of how people park. Please protect beautiful countryside

Wichelstowe is now counted as Wroughton. Put all future housing and doctors and shops in Wichelstowe

Development concentration should be on Wichelstowe and no further expansion of Wroughton

Wroughton cannot take any further development due to the massive strain on resources. Wichelstowe needs its own infrastructure before any more houses are built

No more houses should be built in Wroughton, we have run out of room and our facilties are overloaded - especially the doctors surgery

Need to improve healthcare provision. Maintain green spaces and parish services. Keep public transport routes and increase services on Sundays, and have more routes to ther places - Marlborough, Swindon etc.

Finish Wichelstowe and the eastern expansion before any future development in Wroughton

No further housing developments until a new medical centre is built

Prefer to see Wroughton kept as a village

No more sky high Wichelstowe shed heaps

Better parking facilities to accommodate Ridgeway Schools. Congestion is a problem with future development. Need more doctors and dentists facilities

It would be nice to be able to live in a cheaper property

We don't have the infrastructure to cope with more housing. We need more doctor's availability and traffic down to 20mph

Put British people first when allocating social housing

Important that we remain a village

We already have 4,000 extra homes on the wrong side of the motorway - we don't need any more

No more houses

Stop expansion of Wroughton

Stop expansion of Wroughton

Doctors suregry is needed before any more housing. There has been enough development in Wroughton

The parish has done its part with all the house building in Wichelstowe

Don't build on green fields. Build infrastrcture - surgeries, healthcentres, schools, shops etc. Save our wildlife and green spaces

Wroughton and Wichelstowe are totallty different and should be two separate parishes

Need a doctors surgery at Wichelstowe

There are too many housing developments in progress without the necessary infrastrucrure - i.e. doctors

Better infrastructure before more houses are built - doctors, dentists, schools, road improvements and faster broadband

Comments

No further development in Wroughton. Wichelstowe should be complete before moore houses go in Wroughton. Wichelstowe should have its own doctors and its own parish council

My four sonns can't afford to buy in village which means more pollution to travel to see them

No future developments on agricultrual fields or houses linking Swindon and Wroughton

Stop turning bungalows into houses - less properties available for older folk

We need to protect the green spaces or future generations will not have spaces to play in or look at. More buildings means more driveways which means more flooding

Infrastructure should be delivered before development. If the M4 has an accident on it, nobody can move anywhere in Wroughton and Wichelstowe

Adequate off road parking is essential for any new build housing

Infrastructure before development

Wroughton doesn't need any more housing

Against future development of Wroughton - want it to stay a village. Too much pressure on doctor's and pharmacy. GW Hospital too small. Wichelstowe jas grown massively - no need for houses in Wroughton

Too much allocated for Wroughton alongisde what's already planned an in Wichelstowe

We have enough housing, any more will spoil this large village, which is already at capacity. More housing will change the characteristics of the area for the worse

New developments mean Wroughton will no longer be a village, it will be a large town. We should have a large store here, so people don't have to pay 'small shop' prices

Need a big housing development near Overtown to link Chiseldon, Alexandra Park, Thorney Park and across to Uffcott. Development will finance a new road to join A4361 to A 346

No further development in Wroughton, the infrastructure is struggling to cope - doctors, traffic, waterworks etc.

Not to overcrowd the village

Council houses, first time buyers

We are already oo big for the infrastructure we have

No overdevelopment in Wroughton

Retain the character of the village

No point building more houses without improved services, including travel routes and making Wroughton a destination. Need to stop HGVs using Brimble Hill

Council houses rather than affordable housing

The foul drain in Marlborough Road, Moormead Road and Swindon Road is inadequate for further large housing developments

No future housing developments should be allowed until all infrastructure has been completed

Wroughton should stay separate and independent from Wichelstowe. Few people want any further development. Fields need to remain green and to produce food. Stop concrete growth and promote village identity

There is too much housing being built on green fields. It would be better to use empty buildings and brownfield land

Comments

Focus on existing empty properties

We have had our fair share - no more

If we keep building, this country will be covered in bricks and motar in 500 years. We need a new solution - god help the human race

The village is far too big now. We don't need large or small developments

Wroughton will soon not be a village

Wroughton has already expanded too much. It's no longer a village. The only thing saving it being swallowed up by Swindon is the motorway

No more large developments as we'll lose our village community. Doctor's surgery is over stretched

Not too much more housing. We need another GP surgery and shops if further houses are built

If only better checks were made on developers/builders

No more houses built in Wroughton at all - there are enough brownfield sites in Swindon that could be developed. In Wroughton the infrastructure and facilities cannot cope

More should be done to develop brownfield sites or redevelop empty homes. There must be more infrastructure. Feels like Wroughton has become an extension of Swindon

Wroughton is literally cracking up under the strain of development - constant roadworks for different utilities. We are full

There are not enough facilities for any more housing in Wroughton

Infrastructure is not keeping pace with the growth of the village. Doctor's appointments are hard to get and traffic is appalling. Infrastructure should come first or developers will get out of providing it

No more housing

There are plenty of new houses in the area - build better infrastructure and a new hospital. And no more building on greenfield sites

We are already losing too many beautiful fields that provide habitats for wildlife. It's time to halt any further plans for large scale development

Any that doesn't get in the way of peoples lives - so fed up wiith big, money-making housing developments

I appreciate that new housing is needed, but we desperately need the infrastructure to supporrt, especially doctor's surgeries

No to building on agricultural land. Ensure infrastructure and medical provision is integral for development. More infrastructure is needed to support existing developments

North Wroughton has been disproportinally tageted for building. A number of local residents feel there has been no pushback against this in the way there has been for other areas in the village

No more housing without more facilities - GPs etc.

Wroughton is a safe and enjoyable place to live. Further large scale development will increase traffic congestion and put demand on schools and healthcare, plus anti social behaviour

Huge development still to come for Wichelstow, so Wroughton needs protection and improvements before more development

Use park and ride for future development

Comments

More parking is needed for new houses. Parking in narrow new estate roads causes havoc

No further large scale projects until a new health centre is built

There is no need for further house building around Wroughton as there is not enough infrastructure to support it

No more housing - it spoils the village. More consieration for the wildlife

No more development on flood plains. Green corridors for wildlife. Architecture that suits the surrounding countryside

I would prefer not to see any large scale development in Wroughton, particularly while Wichelstowe still isn't finished

Housing must be social and affordable but my main concern is the preservation of farmland wherever possible - we have to eat

Could small homes take over long unused shops?

Concentrate on Wichelstowe

No more development - Wroughton cannot take any more expansion

We can't cope school-wise, doctors and mostly traffic - so no to more housing

We need to protect the green fields we have left

Wichelstowe should be its own parish. You are destroying the countryside around us

Our green open spaces need to be protected

There is already so much housing development going on and healthcare has not met demand. I value the nature in Wichelstowe and it would be a shame to reduce this further

We are a village and need to protect that. Our green spaces must be protected and borders preserved. We don't need more houses people can't afford

We need a gym, GP service and dentist in Wichelstowe ASAP - it's been six years and nothing is here yet

Wichelstowe development overcrowded by canal. We need more green spaces in between

The village is at capacity for traffic. The roads around the schools are dangerous. Any further development would seriously add to this problem

All new houses should have air con included

More sheltered accommodation and help for first time buyers

Wroughton village is big enough

Our separation from Swindon should be maintained. No new green field developments. Protect our green spaces and better health provision

No further housing built until we have a health centre up and running

No further large scale development

No further large scale development. Developers should give back to the community in money and facilities

If more house building occurs, we need better infrastructure first

Further development in Wroughton must be limited. Wroughton's road network is not safe or suitable for more housing

Too much in Wroughton, it will be swamped

Future development should maintain village feeling, alongside the necessary infrastructure and services

Comments

Wroughton and Wichelstowe should be considered separately. I see no need for more housing in Wroughton
