Overview

The Dewalt DCL079 18v XR cordless, durable and adjustable LED Tripod Light that is designed to illuminate any workspace even in low light conditions. Body Only.

Perfect for tradespeople and DIY enthusiasts, this tripod-style light can generate a powerful, expansive and consistent beam of LED light.

It features 3 brightness settings ranging from 1000 lumens to 1800 lumens to 3000 lumens so you can match the light intensity to the task at hand.

The maximum light setting produces a beam which is 30% brighter than a 500W halogen light whilst the 3500K warm light colour helps to minimise glare and protect eyes during operation.

To enable you to beam light into the most awkward and hard to reach areas, the DCL079 is fully adjustable from top to bottom. It boasts a 240° rotatable lamp head with a 200° moveable pivot angle and the telescopic pole's height can be positioned up to 2.2 metres.

Its heavy duty construction combined with the tripod base provides a stable foundation meaning it is less likely to topple over during use.

This 18v cordless tripod light from Dewalt is suitable for use indoors and outdoors thanks to its IP55 rating which protects the components from dust and water ingress.

The DCL079 collapses to a height of 1 metre in an instant and is fitted with a convenient carry handle for easy transportation and storage.

Battery, charger and carry case NOT included.

Features

Cordless lighting for indoor or outdoor use

3, easy-to-adjust brightness settings

3500K warm light colour to reduce glare

LED for increased lumen output per square inch

Adjustable angle lamp
