Subject: Edward Bays Estimate

Dear Sir/Madam,

Following our engineers visit earlier this week, we send you an estimate for a replacement pressurisation unit and an external fill loop.

Having reviewed the possibilities for the community centre heating system, we would advise having the pressurisation unit installed.

Materials for the pressurisation unit are £ 1734.86 + VAT.

Labour is charged at £ 65.00 + VAT per hour and estimated to take between 4 and 6 hours.

The external filling loop is £ 35.26 + VAT and labour is estimated to take between 3 and 4 hours.

If you would like to proceed, please respond to this email with your acceptance at your earliest convenience.

With kind regards,

Edward Bays Admin Team
