

Treebitz

Quotation:

June 5th, 2025

1. Supply and build 1 x plant exchange shelving unit with 1 lower shelf 1 higher shelf and a roof, similar but not identical to the example you sent on text. Shelves to be slatted, roof and back to be feather board or similar. Size to be approximately 4ft high and wide and 14" deep or thereabouts. Although Treebitz almost exclusively uses our own sustainable timber and is committed to environmental sustainability, the outdoor nature of this project means that we would need to buy in treated larch timber for this part of your project.

£250

2. To manufacture four 'plant crates' approximately 22"x 18" by 6" deep using sustainably sourced timber from our own source.

£70

3. To manufacture 1 sign with the Wroughton Parish Council wording/logo and 'Swap Shop' laser cut onto a piece of our own sustainably sourced hard or softwood. Logo and wording to be agreed beforehand.

£40

4. Deliver to Wroughton any or all the above.

£25

'We are a local business manufacturing wooden products almost exclusively from waste timber from the sister tree surgery business.'

Part 1 will be a solid, freestanding structure, not a flimsy internet flat pack.

Payment on delivery please.
