

Dear Residents,

We are writing to inform you that works associated with the installation of new street lighting will be taking place within the footway area of Woodlands View during June 2026.

The works are required to facilitate the replacement of one existing streetlight and the installation of two new streetlights as part of the ongoing development works at Woodlands View.

The programme of works is currently planned as follows:

- 10th – 12th June 2026 – Excavation works to be undertaken by Conlon Ltd using a vacuum excavator (Vac-Ex).
- 15th June 2026 – Electrical disconnection and connection works to be undertaken by SSE/OCU, including the disconnection of the existing street light column and the installation of new connections for the replacement and new streetlights.
- From 16th June 2026 onwards – Backfilling and reinstatement of the excavated areas to be undertaken by Conlon Ltd.
- 15th June 2026 – Final connection and commissioning of the new street lighting lanterns to be undertaken by Enerveo following completion of the electrical connection works.

During this period, residents may notice the presence of construction operatives, specialist equipment, and associated vehicles within the area. The works will be carried out in accordance with all relevant health and safety requirements, and every effort will be made to minimise disruption to residents.

We would particularly like to advise residents of Nos. 25 and 27 Woodlands View that works will be taking place within the footway adjacent to their properties. However, access to all properties will be maintained at all times throughout the works.

We apologise in advance for any inconvenience these works may cause and appreciate your patience and understanding while they are undertaken.

Yours faithfully,

Hills Homes Developments Limited
