

St John Ambulance First Aid Villages Project Update

We have now scheduled our last 3 resident first aid sessions which are taking place in September and November. We now have trained first aiders, who are happy to be identified by a window sticker, in the following streets:

- Boness Road
- St Andrews Close
- St Johns Road
- Elcombe Avenue
- Bakers Road
- Badgers Brook
- Perrys Lane x 2
- Wharf Road
- Kerrs Way
- Maskeleyne Way
- Priors Hill
- Lords Close
- Lancaster Road

We have received some excellent feedback from attendees. Please see below some of the quotes. We haven't received any negative feedback at all which is testament to Bob Sanderson and the St John Ambulance team.

Everything was explained and demonstrated clearly and accurately

The team were very friendly and knowledgeable

It was well worth attending this course. Even though I have done some basic first aid training in the past this was a great refresher and I learned some new things too.

The knowledge learnt on this course could save somebody's life!

Excellent event, life saving skills delivered in a friendly non intimidating environment everyone able to should attend!

I think the structure of the course & the information given was excellent. The tutors were approachable & knew the subject well.

A very useful and interesting course
