Agenda Item 11 – Update on New Bins at Ridgeway Park

Purpose of the Report
Members are required:

- To **NOTE** the progress report.

Overview

A resident has requested a new dual-purpose litter/dog bin be placed somewhere at Ridgeway Park due to a current lack of bins in the immediate vicinity.

At its meeting on 9 September, the Community Assets and Open Spaces Committee agreed to install two new bins at Ridgeway Park (CAOS/54) in order to improve local amenities for residents.

Ridgeway Park is managed by property company FirstPort, who have been supportive of the parish council's attempts to install two new bins.

Since the meeting on 9 September, progress has stalled because residents have been unable to agree on locations for the bins.

Most Recent Update – Nov '26

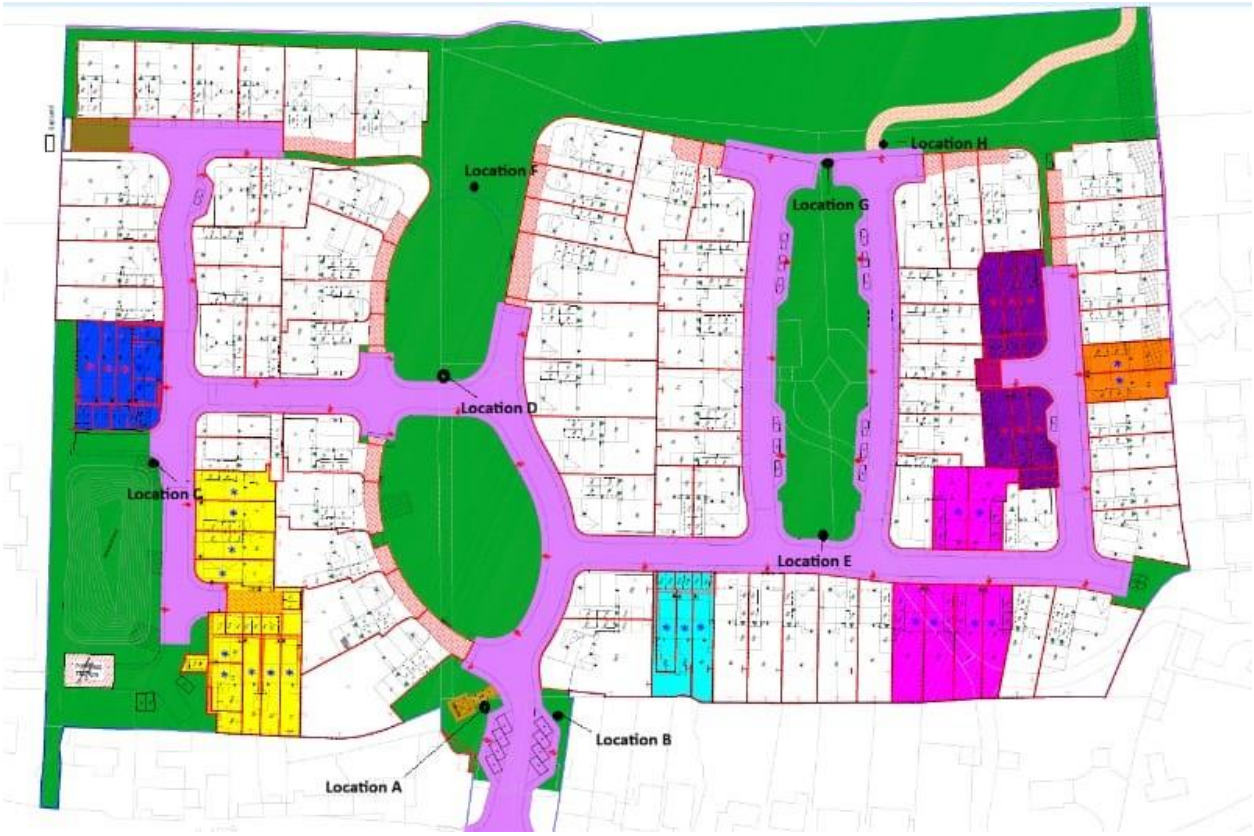

One of the residents keen to see the bins installed has informed the parish council that a survey has been sent to all residents to get their opinions on locations.

The proposed locations sent to residents in the survey are outlined on the below map.

Once the surveys have been completed, the parish council will be in a better position to know where residents want the bins placed.

In the meantime, the parish council will continue to work with residents and FirstPort to progress this work.

Map of proposed bin locations in residents' survey:

The parish council has agreed to buy, install and empty only **two** new bins. We would not expect bins to appear at every proposed location on the above diagram.
